ABOUT ME

Result tasty individual with a track record of managing a community of international students on the Steemit blockchain. Experienced in managing front-end web architecture, the responsiveness of applications, and coordinating with user interface designers to bring live their designs. Conceptualizing, developing, testing, and implementing back-end front-end applications. Proficient in the use of Back-end languages such as Javascript, HTML, and CSS including other languages, and frameworks such as Node Js, React Js, and Express Js.

Founder and CEO of CampusConnect, a social interaction community built on the Steemit blockchain positioned to help students to interact, share campus-related experiences, and ultimately impact the world through sensational writing skills.

Ability to work under pressure, good communication skills, ability to learn quickly, and adapt to changing needs, good problem-solving skills, ability to work remotely, and crush deadlines.
